

The "REAL" German Lavatec Laundry Technology back on top again!

Company

Lavatec Laundry Technology

- is the legitimate successor of the previous Lavatec GmbH worldwide
- Lavatec Laundry Technology is the original
- stands for the future of Lavatec
- stands for proven and tested quality of the Lavatec products made in Germany
- offers full service and maintenance for all Lavatec products since 1986 (founding of the company)
- guarantees to be the only company offering the complete line of spare parts in original quality – with short-term availability
- is financially solid, economically successful, and it is your stable partner for the future
- manufactures the well-established product lines, and it invests in, and develops, the new laundry machinery of the future
- is an expanding enterprise; increasing revenue and profits enable growth in the number of staff, and investments in state-of-the-art technology of the future

Services

Lavatec Laundry Technology

- guarantees, thanks to blanket coverage by its service network, the fastest and most cost-efficient availability of service technicians and spare parts at the customer's site
- guarantees to be the only company offering parts in original quality – and at a low price thanks to production by this company
- is the only company which is able to offer all spare parts from a single source, in particular original spares
- offers security of investment; customers of Lavatec Laundry Technology participate in technological progress, e.g. through the downward compatible further development of management software and other software and hardware components
- guarantees fastest response times and 24-hour availability 365 days a year
